## About works with Mi Home

The product works with Mi Home, and can be controlled through Mi Home app. Scan the QR code to download and install the Mi Home APP. You can also search for "Mi Home" in the app store, and download from there. Open the homepage on Mi Home, click "+" in the upper right corner of the page, and add devices according to the app prompt.

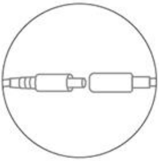
Note: Due to the upgrade and update of the Mi Home APP, the actualoperation may be slightly different from the above description; please follow the instructions in the app.

Please note that "works with Mi Home" is only for software verification, and Xiaomi and Mi Home are not responsible for the production, standardimplementation, quality supervision and other aspects of the product and enterprise.

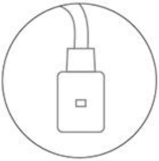
works with Mi Home

# Power On

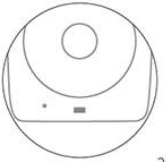
Plug the power cable into the power jack of the camera and the camera will automatically turn on.



1. Before the router is connected, the camera will prompt "Waiting for connection" after powered on. When the router is successfully connected, the camera will prompt "Initialization is complete" or "Network connection is complete" after powered on.



2. When the battery status LED is on, and the device prompts “Waiting for connection,” the device is powered on successfully. If the device prompt is not "Waiting for connection," please long press the reset button to restart.



3. The status LED flashes red.

# Add Devices

1.Open the homepage of Mi Home app and click “+”in the upper right corner of the page to add a device and select corresponding camera.
